

Engineering Excellence in Power Transmission

COMPANY

PROFILE

aldhia infratech

About Us

Established in 2016, Aldhia Infratech is a specialized engineering and construction company focused on Overhead Transmission Line (OHTL) projects, including civil works, tower erection, stringing, and wiring. We have grown into a trusted partner in power transmission, mechanical, and electromechanical construction.

Driven by quality, safety, and professionalism, we deliver reliable solutions through skilled manpower, modern equipment, and efficient project execution. Our commitment to excellence and customer satisfaction supports the Kingdom's expanding energy infrastructure and the objectives of Saudi Vision 2030.

aldhia infratech

Vision

To be a leading and trusted provider of power transmission infrastructure solutions, delivering engineering excellence, innovation, and sustainable value while supporting Saudi Arabia's Vision 2030 and the nation's growing energy demands.

Mission

To provide innovative and high-quality power transmission solutions through advanced technology, skilled manpower, and a commitment to safety, integrity, teamwork, and customer satisfaction.
